PICK OF THE LITTER

Inspection
Type: ROUTINE INSPECTION
Date: APR-26-2006

3.6 (a)(2)

PRIMARY ENCLOSURES.

Enable all surfaces in contact with the dogs and cats to be readily cleaned and sanitized in accordance with Sec. 3.11(b) of this subpart, or be replaceable when worn or soiled.

Pen #228 has a large crack in the concrete of the outdoor portion of the dog run.

Surfaces of the dog enclosure must be smooth and easily cleanable to be sanitized on regular basis. A large crack in the concrete allows a buildup of waste and debris which will not allow the surface to be cleaned and sanitized effectively.

This citation still has time on the correction from the previous inspection. The correct by date is 26 May 2006.

Last inspection: 25 January 2006

End of report.
